ANOTHER BREAK-IN?

WORRIED ABOUT AN
ELDERLY RELATIVE'S
HOME SECURITY?

Re-Discover Your
Peace Of Mind With

ZENTRY™

HOW SAFE IS YOUR HOME?.....

Timber doors and the windows of apartments and homes together represent the single greatest access point for a burglar's unlawful entry - particularly between the hours of 1 and 4 o'clock in the afternoon.

WARNING OVER 500 HOMES BURGLED EVERY WEEK IN IRELAND

Many experts agree that timber used in entrance doors of apartments and homes will not keep the burglar out.

In 2008 over €100m worth of goods were stolen from Irish homes.

In 2009, a total of 26,793 burglaries were recorded in Ireland – CSO Report.

Burglaries throughout Ireland will continue to increase throughout 2010.

Depending on where you live in Ireland, you have a between a one-in-thirty and one-in-seventy chance of being burgled this year.

BURGLARS TO FACE A NEW CHALLENGE FROM EUROPE.....

If you've been the victim of a burglary you will be aware of the utter devastation this causes. As well as the financial cost, there is the trauma of having your home broken into and personal belongings taken. The shock hits you in the pit of your stomach that can leave you feeling violated. You may never feel the same about your home again, and ultimately want to move house - perhaps even away from family and friends.

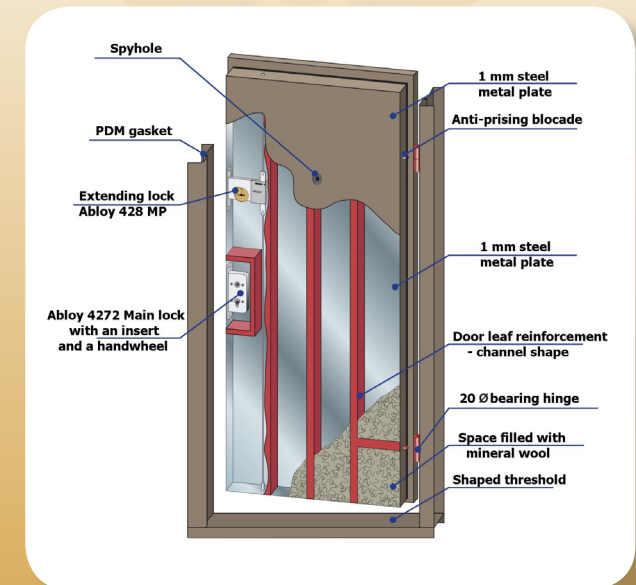

DON'T LET THIS HAPPEN TO YOU.

THE GOOD NEWS.....

In response to the need for improving the performance of security/entrance doors, several European countries have already introduced the new European Security Standards EN 1627-1630. In Italy and Sweden it is now widely accepted that these standards are already deterring many burglars. Later this year the National Standards Authority of Ireland (NSAI) is expected to announce the introduction of these new security standards relating to doors and windows to Ireland, when they will become the national security standard.

BREAK-THROUGH ZENTRY™ BURGLAR-PROOF SECURITY DOOR TECHNOLOGY NOW AVAILABLE IN IRELAND.....

ZENTRY™ Timber/ Steel Doors are certified to EN1627-1630 standards and are internally constructed using steel frame sections. Each section is filled with fire-rated acoustic Rockwool insulation to provide both a 60 minute fire and a 30 db acoustic rating. All doors are equipped with multi-locking, welded hinges and 3 security dogbolts for added security.

WARNING

Before ordering your security door, you should ask to see a copy of the Certificate confirming the door complies with European Standards EN1627-1630. This standard has three major classifications Class 2, Class 3 and Class 4.
